Summary

As a seasoned Full Stack Developer with 5 of experience, I specialize in designing and implementing end-to-end solutions. Proficient in front-end technologies like React.js and Next.JS coupled with strong expertise in back-end technologies such as Node.js and C#, I bring a holistic approach to software development. Skilled in database management and version control (Git), I thrive in creating scalable, efficient, and user-friendly applications. Committed to clean code practices and continuous learning, I am poised to contribute dynamic problem-solving and technical acumen to innovative projects.
